

Ref: PPGCL/ENV/ FY26/534

Date: 06.09.2025

To,

The Member Secretary
U.P Pollution Control Board
Building No. TC- 12 V,
Vibhuti khand, Gomti Nagar
Lucknow - 226010

Subject: Environment statement in Form V for the financial year 2024-2025.

Dear Sir,

Please find enclosed the Environment statement report for the period April-2024 to March-2025(FY24-25) for M/s Prayagraj Power Generation Company Limited, Bara.

This is for your kind information and record please.

Sincerely

Sanjay Bhargava
Chief O&M Services

For Prayagraj Power Generation Company Limited

Enclosures – Environment Statement (Form V) for FY 2024-2025

FORM – V**Environment Statement for the Financial Year ending 31st March 2025****PART-A**

- (i) Name and Address of the Owner/Occupier : Mr. Sanjay Bhargava
of the industry or process Prayagraj Power Generation Company Limited
Vill. - Lohgara, Tehsil- Bara
Distt – Prayagraj, Uttar Pradesh
Pin- 212107
- (ii) Industry Category : Large
- (iii) Production Capacity : 3 x 660 MW (Coal Based Thermal Power Plant)
- (iv) Year of establishment : Unit-1: 2016
Unit-2: 2016
Unit-3: 2017
- (v) Date of last Environment Statement submitted : 22.06.2024

PART-B**Water and Raw Material Consumption**

- (1) Water Consumption (m³/day)
Current Year (2024-2025)
Process : 75,553.4
Domestic : 2,139.55

Name of Product	Water consumption per unit of product output (m ³ /MWh)	
	During the previous financial year 2023-2024	During the current financial year 2024-2025
Electricity	2.04	2.13

- (2) Raw Material consumption

Name of raw materials	Name of Products	Consumption of raw material per unit of output (MT/MU)	
		During the previous financial year 2023-2024	During the current financial year 2024-2025
Coal	Electricity	612.03	589.85
HSD	Electricity	0.14	0.21

- (3) Electricity Generation (MUs)

Name of Product	During the previous financial year 2023-24	During the current financial year 2024-2025
Electricity	12,699.02	12,987.15

PART-C**Pollution discharge to Environment/Unit of output**

(Parameters as specified in consent issued)

Pollutants	Quantity of pollutants discharged (T/day)	Concentration of pollutants in discharged (mass/volume) (mg/Nm ³)	Percentage of variation from prescribed standards with reasons
Water	-	-	Treated process wastewater is recycled within system. Treated domestic effluent is used in horticulture.
Air (1)PM (2)SO ₂ (3)NOx	5.38 122.48 55.42	28.43 647.50 293.00	-

PART-D**Hazardous Waste**

(As specified under Hazardous and Other waste (Management and Transboundary movement) Rules 2016)

Hazardous Waste	Total Quantity (kg)	
	During the previous financial year 2023-2024	During the current financial year 2024-2025
From Process	Cat-5.1: 19.95 kL	Cat-5.1: 41.06 kL
From Pollution Control facilities	Nil	Nil

PART-E**Solid Waste**

Solid Waste	Total Quantity (MT/Annum)	
	During the previous financial year 2023-2024	During the current financial year 2024-2025
A. From Process	Nil	Nil
B. From Pollution Control facilities (Ash)	26,51,938.85	25,48,961.26

C. 1. Quantity recycled or reutilized within the unit 2. Sold 3. Recycled/Utilized	- The Fly ash is utilized in – Cement industry, for ash-based products like fly ash brick, filling of low-lying area and road construction. - Total quantity utilized in FY 24 – 35,07,170.12 MT	- The Fly ash is utilized in – Cement industry, for ash-based products like fly ash brick, filling of low-lying area, reclamation of abandoned mine and road construction. - Total quantity utilized in FY 25 – 29,02,642.36 MT
--	---	--

PART-F

Please specify the characteristics (in terms of concentration and quantum) of hazardous as well as solid wastes and indicate disposal practice adopted for both these categories of wastes.

- The Hazardous waste Used Oil (Cat- 5.1 – 41.06 kL) generated at site was sent to authorized recycler for recycling.
- Solid Waste: Fly Ash was utilized in Cement, Brick, filling of low-lying area, reclamation of abandoned mine and road construction.

PART-G

Impact of the pollution abatement measures taken on conversion of natural resources and on the cost of production.

- (1) Installation of ETP for the treatment of industrial effluent.
- (2) Installation of STP for the treatment of Domestic effluent.
- (3) Installation of Ash water recovery system has been implemented.

The treated effluent is recycled within the system resulting in conservation of natural resource (fresh water).

PART-H

Additional measures/investment proposal for environmental protection including abatement of pollution, prevention of pollution.

- For the control of Air pollution ESP, one bi-Flue stack (Unit 1 &2) and one stack (Unit 3) of 275-meter height, dust extraction and dust suppression system has been installed.
- Online monitoring system has already been installed in stack to monitor SO₂, NO_x, and particulate matter.
- CAAQMS (Continuous Ambient Air Quality Monitoring System) for online ambient air monitoring has been installed.
- For the control of Water pollution ETP & STP has been installed for the treatment of Industrial and domestic effluent. Also, ash water recovery system has been established.
- Coal pile run off pit constructed.
- Green belt has been developed in and around plant premises. The species which have been planted are- Neem, Kadam, Mahua, Sisam, Arjun, Mango, Pipal, Karanj, Kaner, Gulmohar, Siris, Jamun and Bamboo. During FY 25, we planted 37,018 saplings. Till March 25 we have planted approx 3,85,375 lakh saplings.

- We also have developed "Miyawaki Forest" (FY 25) with plantation of suitable local species.
- Environment monitoring carried out by NABL accredited laboratory.
- Dust suppression system has been installed in coal yard area. Fogging system installed at wagon tippler.
- We have installed solar streetlights, solar based garden lights and roof top solar of 204 kW at our school building and 61 kW at hospital.
- 60 No. Solar Street Light has been installed in nearby Berui, Bemra, Khan-semra, Kapari and Jorvat.
- Solar water heaters have been installed on the roof of guest houses.
- LED lamps have been installed.
- Fly ash brick making unit has been installed under CSR activity.
- One check dam has been constructed in Jorvat village.
- Turbo ventilators have been installed in the store and mechanical workshop.
- We have constructed roof top rainwater harvesting systems and rainwater harvesting ponds in the plant premises.

PART-I

Any other particulars for improving the quality of the environment.

- (i) Green Belt developed in and around the factory premises. Additional plantation is also being done in consultation with the local forest department.
- (ii) Good housekeeping is being maintained in and around the power plant.
- (iii) Treated effluent being recycled within the system.
- (iv) Installed solar panels on the roof of school and hospital building.
- (v) Biodegradable waste generated at the site is being managed by third party to convert it into compost.
- (vi) E-waste and battery have been disposed through an authorized recycler.
